

## **MOBILE IOT APP DEVELOPER**

### **Job Brief:**

Previnet Spa is a leader in providing IT and administration services to the Insurance, Finance and Pensions industry and is looking for a qualified Mobile/IOT App Developer to join its IT team. You will be focusing on designing and developing application solutions for Android, iOS and Windows Mobile platforms for all three business units.

Software solutions are to provide services to clients via mobile Apps; you will be designing, building and enhancing dedicated native Apps and protocols which need to integrate with external devices, social networks as well as payment systems.

### **Responsibilities:**

- Research and development of Apps in varying mobile architecture (Android, iOS, Windows Mobile)
- Integrate third party IOT devices
- Trouble-shoot and analyse issues flagged up by users, identify and produce solutions (Bug fixing and trouble shooting)
- Maintain and suggest improvements on existing functionalities

### **Requirements:**

- Degree in Computer science or equivalent field
- 2 – 4 years work experience in implementing innovative user experience solutions using User Interface Design (UI)
- Wide knowledge of mobile App architecture, up-to-date with new technology trends
- Strong understanding of security principles and privacy
- Knowledge of REST architecture, JSON, JavaScript, JQuery, HTML, HTML5, CSS, CSS3, Java EE, JSP, XML, Struts, Angular JS, Spring and pattern Model View
- Preferably have knowledge of development environments: iOS xCode, Android SDK, .NET/Visual Studio for Windows Mobile
- Good interpersonal skills, team working, have good analytic and problem solving capabilities

Previnet Spa is an equal opportunities employer.

Place of work: Treviso, Italy.
