

WEB DEVELOPER

Job Brief:

Previnet Spa is a leader in providing IT and administration services to the Insurance, Finance and Pensions industry and is looking for a qualified Software Developer to join its IT team.

You will be designing and producing app solutions for all three business units; you will focus on designing, writing code and enhancing web J2EE platforms used for back office operating processes, both in terms of presentations and business logic according to client requirements.

Responsibilities:

- Analyse and develop app functionalities for insurance portfolio data processing, pensions and healthcare services
- Design and develop user experience of web users
- Implement API interfaces with Rest/SOA services
- Develop business model logic for complex calculations and controls on integration components with REST / SOA services
- Follow testing and maintenance of the web platform

Requirements:

- Degree in Computer science or equivalent field
- 1 to 4 years' experience in developing Web Services (REST, SOAP)
- Significant work experience in the world of Java EE / #Net, JSP, XML, struts, Angular JS
- Good work experience with web applications and programming tools such as JavaScript, JQuery, HTML, HTML5, CSS, CSS3
- Knowledge of design pattern
- Excellent understanding of security principles and how to apply them
- Good interpersonal skills, team working, have good analytic and problem solving capabilities

Previnet Spa is an equal opportunities employer.

Place of work: Treviso, Italy
