

Quality Assurance Interns

Our culture:

- We care about our product, company and its people.
- We believe in high standards.
- We take smart risks to achieve best results.
- We believe in an open and proactive culture where employees are expected to learn and contribute outside of their core tasks.
- We value personal growth more than previous experience.

Your work matters! You will be responsible for:

- Test execution on actual mobile and desktop devices by collaborating and learning from experienced QA engineers.
- Writing scripts intended for automating build, test or deployment software.
- Expanding Celtra's end to end automated test coverage on mobile and desktop devices.
- Bringing test scenarios to life by using Celtra's AdCreator, an HTML5 platform used for digital display and video advertising.

We expect:

- Some understanding of frontend and backend web technologies.
- You are truly interested in how things work and are always willing to dig deeper.
- Programming skills in bash, python, ruby or applescript.
- Good verbal and written English communication skills.
- Willingness to constantly learn and improve.
- Team players.

A bit about our stack:

- We are based on cloud services such as AWS and Snowflake.
- We use Circle CI, Docker, Selenium Webdriver (desktop test automation) and Eggplant (mobile test automation).

Nice to have (one or more of the following):

- You are excited about continuous integration systems or containerization platforms like Docker, Circle CI and others.
- You are interested in mobile test automation and have perhaps done a few steps on your own already.

We take good care of our people.

This is what we offer:

- Great mentors and coworkers from whom you'll gain valuable insight in quality assurance processes and tools.
- Work in our cosy offices in the very center of old Ljubljana, Slovenia.
- A fridge that is always full and the best coffee in town.
- Paid internship.
